1. A "General Directorate for Polish Motor Industry" (Generalna Dyrekcja Przemysłu Motoryzacyjnego) is being created to replace the Union of Motor Industry, which was subordinate to the Central Administration of Metal Industry.
2. The new organization will control motor vehicle factories, and factories formerly subordinate to the recently liquidated Central Administration of Armament Industry, as well as those of the Union of Aviation Industry, Union of Motorcycle Industry, Union of Bicycle Industry, etc.
3. The new organization will be able to by-pass the Central Administration of Metal Industry, which was believed to handicap its work, and will deal directly with the Ministry of Industry and Trade, thus achieving a greater measure of administrative independence.
